

PAID INTERNSHIP DESIGN ENGINEER

Are you looking for a dynamic work environment in an international group of companies? Step aboard! Our promise to you is to value your contributions, treat you with respect and fairness, reward your abilities and to support you in developing your potential.

ICE Marine Design (ICE) is Europe's largest independent ship design and marine engineering company, with a 55+ years history and clients world-wide.

What will you do as an INTERN at ICE:

- You will develop a theoretical and practical base of knowledge related to the design work requirements specific to each phase and stage of project development,
- You will learn to apply practical design skills to execute engineering projects or services, in the drafting phases of the project.

Throughout the INTERNSHIP period, training and skills development will be achieved under the guidance of a specialist.

We are waiting to join us in the INTERNSHIP program if you:

- Are a final year undergraduate student or a recent graduate in Engineering (Faculty of Naval Architecture or Faculty of Automation, Computers, Electrical, and Electronic Engineering)
- Have basic knowledge of CAD/CAE and/or AVEVA Marine//E3D/Cadmatic/ShipConstructor,
- Have basic knowledge of the design process.

What we offer as an Intern at ICE:

- Internship contract for 3 months, with a program that allows you to continue your studies and actively engage in the academic environment,
- Internship paid for the entire period,
- Career development opportunities,
- International work environment.

WE ARE WAITING FOR YOU IN OUR TEAM!
